

Call for Papers
QuantBridge Applied Quantitative Webinar Series
Fall 2026
Submission Deadline: August 1, 2026, 11:59 PM EST

Purpose

The QuantBridge Applied Quantitative Webinar Series provides a forum for graduate researchers to present ongoing empirical work, receive constructive feedback, and engage with an interdisciplinary community of emerging scholars. We welcome submissions combining strong theoretical motivation with rigorous quantitative, econometric, or causal inference methods.

Eligibility and Scope

Submissions are invited from graduate students in **Public Policy, Applied Economics, Sociology, and related social science disciplines** at any stage of development, provided preliminary analyses are available. Topics of interest include poverty and inequality, labor markets, health, education, family structure, and the evaluation of public programs and policies, though all substantive areas are welcome. We accept empirical work across the full spectrum of quantitative social science, so long as methodological choices are clearly justified and appropriate to the research question.

Submission Instructions

Submit through the [QuantBridge Submission Portal](#). The following items are required:

1. An online form including the paper title and the name, institutional affiliation, contact information, and CV for the corresponding author.
2. An abstract of **1,000 words or fewer** describing the research question, theoretical motivation, data and empirical methodology, and preliminary findings if available.

Selection Criteria

Submissions will be evaluated by the QuantBridge Scientific Committee based on:

- Originality, significance, and theoretical motivation of the research question;
- Rigor and appropriateness of the study design, methodology, and data;
- Potential contribution to scholarly and policy-relevant knowledge.

Final selections will also consider balance across topics and disciplines.

Timeline and Important Dates

Submission Deadline	August 1, 2026 (11:59 PM EST)
Notification	August 15, 2026
Webinar Series Begins	September 2026
